

WE PROVIDE
Insurance Brokerage
to Physicians and Group Practices

The MPL Risk Advantage

We specialize in providing insurance products to the healthcare industry, and work with physicians and a variety of healthcare businesses across the US. This broad reach allows us to anticipate changes in carrier rates, be the first to offer new carriers in your state, and be informed of the latest policy coverage features.

Simply put, we help reduce your premiums and enhance your insurance coverage.

We have also adapted to the evolving healthcare landscape. A traditional medical office or clinic is now faced with a different set of risks today than ten years ago – telemedicine, EMRs, shifting delivery of care to ancillary providers and more in-house services are all common place. A review of a legacy insurance program could reveal significant gaps in coverage.

Our programs can tailor to your operation and respond to today's risks.
